n8n Dashboard

Monday, November 17, 2025   11:55 AM

We can use n8n software either in local machine or in Cloud.

Webapp = n8n.io --> Cloud

n8n Dashboard:

Credentials: To add credentials of different tools like gmail account etc.

Executions:
History of steps taken.

Templates:
Pre-built templates.

Variables:
A piece of data you store and reuse inside your workflow.

Workspace:
Section where we work. In a workspace we have Projects.

Projects:
Inside projects, we have workflows.

Workflow:
Inside workflow, we have nodes.

Nodes:
Each node is considered as STEP. While an entire run through a series of nodes is an 'EXECTION'.

Workspace --> Projects --> Workflows --> Nodes
